The request filed on January 7, 2005 for a Continued Examination (RCE) under
 CFR 1.114 based on parent Application number 10/766, 159 is acceptable and a
 RCE has been established. An action on the merits for the RCE follows.

- 2. Claims 1-9 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: The prior art of the record fail to teach or suggest singly and/or in combination a method and apparatus for determining a motion vector of a block of at least of part of a video frame with respect to a reference video frame, the reference video frame comprising a plurality of pixels which provides for defining an interpolated version of the reference video frame, comprised of the pixels and interpolated pixels, the interpolated pixels being generated by interpolation of at least two pixel, the interpolated pixels being located adjacent to at least one of the pixels being exploited for the interpolation, defining a region within the interpolated reference video frame, the dimension of the region being determined by a predetermined maximal length of the motion vector, calculating mathematical norms of the block at a plurality of positions defined by the region in the interpolated version of the reference video frame, wherein the interpolated pixels are calculated when a norm calculation in such a position requires the interpolated pixels as prescribed for in the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
